### 1 - GOVERNING STATUTES, NATURE OF OPERATIONS AND GENERAL INFORMATION (cont'd)

The unaudited interim condensed consolidated financial statements (the "consolidated interim financial statements") are in compliance with the International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"). Since they are condensed financial statements, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), have been voluntarily omitted or summarized.

The preparation of financial statements in accordance with IAS 34 requires the use of certain accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements have been set out in note 5 of the Company's consolidated financial statements for the year ended December 31, 2019. There has not been any significant change in judgments, estimates or assumptions since then. These consolidated interim financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended December 31, 2019.

The consolidated interim financial statements were prepared using the same accounting policies and methods as those used in the Company's consolidated financial statements for the year ended December 31, 2019.

The interim consolidated financial statements for the three and six-month periods ended June 30, 2020 (including comparative figures) were approved by the Board of Directors on August 27, 2020.

### 2 - GOING CONCERN ASSESSMENT and COVID-19

These interim consolidated financial statements have been prepared on the basis of the going concern assumption meaning the Company will be able to realize its assets and discharge its liabilities in the normal course of operations.

The level of revenue currently being generated is not presently sufficient to meet the working capital requirements. The Company's ability to continue as a going concern is dependent upon its ability to raise additional financing. Even if the Company has been successful in the past in doing so, there is no assurance that it will manage to obtain additional financing in the future. Also, the Company incurred a net loss of \$1,344,597 for the six-month period ended June 30, 2020 (\$864,766 for 2019), it has an accumulated deficit of \$25,233,611 as at June 30, 2020 (\$23,623,950 as at December 31, 2019) and it has not yet generated positive cash flows from operations on a regular basis. Until that happens, the company will continue to assess its working capital needs and undertake whatever initiative it deems necessary to ensure that it continues to be in a position to meet its financial obligations. These material uncertainties cast significant doubt regarding the Company's ability to continue as a going concern.

The World Health Organization declared the COVID-19 outbreak as a global pandemic in March 2020. Since that time, businesses all over the world from a wide swath of industries have seen their operations negatively impacted by the health and safety measures, including limitations on the movement of goods and individuals, put into place by local governments to help control the spread of the outbreak. Although those measures have been relaxed in recent months thanks to a global decline in the proliferation of the virus, which has allowed many businesses, including the Company, to slowly resume their operations, there still remains a great deal of uncertainty as to the extent and duration of the future impact of COVID-19 on global commerce and the Company's business.

The interim consolidated financial statements do not include any adjustments or disclosures that may be necessary should the Company not be able to continue as a going concern. If this were the case, these adjustments could be material.

### 3. CHANGES IN ACCOUNTING POLICIES

#### 3.1 New Standards adopted as at January 1, 2020

Some accounting pronouncements which have become effective from January 1, 2020, and have therefore been adopted do not have a significant impact on the Company financial results or position.

### 4 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The unaudited interim consolidated statements have been prepared in accordance with the accounting policies adopted by the Company most recent audited statements for the year ended December 31, 2019.

### 5 - BUSINESS COMBINATION

On January 1, 2019, the Company through its subsidiary called Asia Synergy Credit Solutions ("ASCS") transferred certain assets and personnel from Wuxi Wenyi Financial Services Co.. Wenyi offers turn-key credit outsourcing services to banks and other lending institutions in China. The asset transfer was made to enhance the Company position in the commercial lending market in China. The assets acquired are intangible assets consisting of loan-servicing agreements. The assets acquired were determined to constitute a business combination and, accordingly, the acquisition will be accounted for using the acquisition method of accounting.

The maximum purchase price for this acquisition was estimated at \$2,000,000, and the fair value of the consideration transferred at \$489,000. The purchase price will be settled with the issuance of a maximum of 20,000,000 shares of the Company if certain financial performance of ASCS is achieved during the first 21 months (1) of operations. In the event that 20,000,000 shares are issued after the 21-month period and the listed common share price of the Company is less than \$0.10 at that time, the Company will issue additional shares to obtain an aggregate consideration value of \$2,000,000.

The financial performance measure of ASCS was originally after an 18-month period. To take in consideration the Covid19 effect on business performance, it was mutually agreed to add three months to the original agreement to compare the performance targets with the target and determine final share issuance.

The fair value of the consideration transferred was estimated at \$489,000, based on management financial projection of ASCS over the first 21 months of operations. The Company used a probability-weighted estimate to determine the number of shares to be issued based on certain financial performance targets. The number of shares estimated to be issued represents management estimate of an 80% probability that the financial performance will be achieved.

The market price (\$0.03) at which the share will be issued used in the model was estimated using the average historical price from the 6 months prior to the acquisition and the historical volatility over the payment term. The payment was then discounted using the Chinese risk-free rate (4.8%). The Company considers that the risk of the projection being realized was already taken into account through the probability-weighted estimated result.

At acquisition, the Company recognized a gain on bargain purchase of \$941,000 for the difference between the value of the identified assets acquired and the fair value of the consideration transferred

As at December 31, 2019, the Company revised its estimation of the fair value of the contingent compensation. The re-evaluation process performed after the first year of operations of ASCS indicates that the financial performance criteria were achieved at 77.1% of the agreed target. As per the asset transfer agreement, the Company should have issued a total of 12,328,611 shares as a purchase price in 2019. Following administrative delay, it was agreed by both parties to postpone the issuance of the shares to 2020. Management initial financial projections for 2020 were maintained, based on the results obtained in 2019. The market share price used for the estimation of the fair value as at December 31, 2019 was established at \$0.05 based on the current market price and the historical volatility of the Company.

The initial conditional compensation liability of \$489,000 was re-evaluated on December 31, 2019, at a fair value of \$748,000 considering the past performance, forecasted results and projected market share price at issuance. The difference of \$259,000 between the re-evaluated fair value of the remaining conditional compensation and the previously accounted amount was recognized as a change in fair value of the contingent compensation payable in the consolidated statements of comprehensive loss of the period.

The contingent liability relating to the 2019 shares that should have been issued, was classified as shares to be issued in the consolidated statements of changes in equity. The value of those shares was determined by using the market price as at December 31, 2019. The difference of \$254,586 between the value of shares to be issued (\$493,414) and the fair value of the contingent liability (\$748,000) is presented as a short-term liability in the consolidated statements of financial position.

The Company's valuation of intangible assets has identified loan servicing agreements which are amortized on a straight-line basis with a useful life of 10 years. Significant assumptions used in the determination of intangible assets, as defined by management, include month over month loan renewals, discount rate and operating income before depreciation and amortization margin.

There were acquisition-related costs which amounted approximately to \$10,000 with respect to consulting and professional fees. These costs were not included as part of the consideration transferred and have been recognized as an expense in the consolidated statements of comprehensive loss for the year ended December 31, 2019.

**6 - LOANS RECEIVABLES AND ALLOWANCE FOR CREDIT LOSSES**

In May 2018 the Company established a licensed financial services' subsidiary in China named Asia Synergy Financial Capital ("ASFC") to provide various financial services to small and medium size enterprise and entrepreneurs. Those services include loans, who for the most part, are guaranteed by a third party and/or collateral assets. Interest revenue from the loans is accounted for as earned. The loans bear interest at an average annual rate of 15.9% since the beginning of ASFC operations calculated on their face value. At inception, loan weighted average repayment period was 16.3 months. For the majority of loans granted, principal and interest are payable by the borrower on a monthly basis.

Loans receivables are described as follows :

**Impaired loans and allowances for credit loss**

The Company performed a three-stage forward looking impairment approach to its loan portfolio to measure the expected credit loss as described in detail in note 4.10 of the Company Consolidated Financial Statement as of December 31, 2019.

*Credit quality of loans*

The following table presents the gross carrying amount of loans receivables at June 30, 2020 , according to credit quality and ECL impairment stages

ECL is calculated on loan value at the period end that are not insured by a third party with an assumption of a credit loss allocation provision applied as follows :

		Provision %	Credit loss allocation applied - Auto	Credit loss allocation applied - Residential

Considering the low number of individual items, evaluation of expected credit loss for debtors are performed at each period end based on past experience, credit default evidence and payment habit.

At June 30, 2020 an amount of \$83,925 (\$83,925 at December 31, 2019) was registered for expected credit loss for debtors.

- (1) As per an agreement with certain loan insurance provider, ASCS, a subsidiary of the Company must maintain a deposit with a loan insurance provider representing 10% of the value of loans serviced by ASCS on behalf of the certain Commercial Bank guaranteed by loan insurer providers. ASCS third party financial partners and the Company's ASFC subsidiary have a three-way agreement in place with ASCS under which third party financial partner and ASFC are jointly responsible for providing and maintaining the 10% safety deposit with a loan insurance provider on behalf of ASCS in exchange for a service fee representing a percentage of the amount of the safety deposit provided. The agreement indicates that in case of default by the borrowers, ASCS will retrieve all the rights to realize the collateral.

**12 - DEBENTURES**

**12 a) i) Debenture issuance of December 15, 2017**

On December 15, 2017, the Company has placed a total of 1,200 units of debentures at \$10,000 par unit for gross proceeds of \$12,000,000. Each unit sold is comprised of \$10,000 face value debentures plus 200,000 common share purchase warrants.

Debentures are secured by a pledge on the aggregate assets of the Company, maturing on December 15, 2019, bearing interest at a nominal rate of 8% payable monthly. The Company used the residual value method to allocate the principal amount of the debenture between the liability and the contributed surplus. Under this method, an amount of \$2,721,260 (net of transaction costs) related to the warrants issued was applied to the contributed surplus. The fair value of the liability component was \$9,005,148 computed as the present value of future principal and interest payments discounted at a rate of 25%. The debentures allow their subscribers to surrender part or all of the amount invested in the debentures to exercise their warrants and purchase common shares of the Company any time prior to maturity, subject to certain terms and conditions, at a price of \$0.05 per common share. The units contain a "forced warrant conversion" feature under which 50% of the face value of the debenture will automatically be surrendered to exercise 50% of the warrants if the Company common shares trade at \$0.15 or more for 3 consecutive trading days, and 100% if the Company's common shares trade at \$0.20 or more for 3 consecutive days.

On the same date the debentures were issued, some debenture subscribers surrendered their debentures for a total face value of \$6,350,000 to exercise 127,000,000 warrants at a price of \$0.05.

During the year 2018, 36,000,000 warrants were exercised at a price of \$0.05 following surrendering of debentures for a total face value of \$1,800,000.

During the year 2019, 5,400,000 warrants were exercised at a price of \$0.05 following surrendering of debentures for a total face value of \$ 270,000.

**12 a) ii) Debenture issuance of December 15, 2017, extended to December 2020**

On or before the maturity date of December 15, 2019, the company reached an agreement with holders of the debenture to extend the maturity of the debenture on December 15, 2020, at the same terms and conditions. At that time, the remaining face value of debentures was \$3,540,000.

The remaining 70,800,000 remaining warrants at maturity accompanying the debenture were replaced by new warrants with the same attributes, except that they will expire on December 15, 2020, to coincide with the new maturity date of the debenture. For each warrant that is tied to the debenture, debenture holders will also receive an additional warrant that will allow them to acquire common shares of the Company at a price of \$0.08 per share at any time for a period of 24 months from their date of issuance.

An exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

The renegotiation created a debt extinction for accounting purposes. The initial debt was derecognized and a new debt recognized at fair value, creating a loss on extinction of debt of \$816,793.

The Company used the residual value method to allocate the principal amount of the debenture between the liability and the equity component. Under this method, an amount of \$1,388,688 related to the conversion features and the warrants issued were applied to contributed surplus only as the debenture is non-convertible. The fair value of the liability component was \$2,968,124 computed as the present value of future principal and interest discounted at a rate of 30%.

**12 b) Debenture issuance of December 19, 2018**

On December 19, 2018, the Company has placed 51 units of unsecured convertible debentures at \$10,000 per unit for a gross proceeds of \$510,000. Each unit sold is comprised of \$10,000 face value debentures, maturing on December 19, 2020, bearing interest at a nominal rate of 8% payable monthly, plus 10,000 purchase warrants exercisable into Company common share at \$0.10 per share for a period of 24 months from the date of issuance.

The debentures allow their subscribers to convert them into common shares of the Company at any time prior to maturity, subject to certain terms and conditions, at a price of \$0.05 per common share.

The units contain a “forced warrant conversion” feature under which the debenture will automatically be surrendered and converted into common shares of the Company should the shares of the Company trade at \$0.20 or more for 3 consecutive trading days.

The Company used the residual value method to allocate the principal amount of the debentures between the liability, equity component of debentures and the contributed surplus. Under this method, an amount of \$93,940 and \$3,578 (net of transaction costs) related to the conversion features and the warrants issued was applied to the equity component of debenture and contributed surplus (respectively). The fair value of the liability component was \$396,672 computed as the present value of future principal and interest discounted at a rate of 22%.

### 13 - BONDS

On May 29, 2020, the Company has placed 400 units of secured corporate bonds at \$1,000 per unit. Each unit sold is comprised of \$1,000 face value bonds, redeemable on June 10, 2023, bearing interest at a nominal rate of 10% payable monthly, plus 200 purchase warrants exercisable into Company common share at \$0.10 per share for a period of 36 months from the date of issuance.

The Bonds will be redeemable after 36 months from the date of issuance (the "Initial Maturity Date"). Each holder has a right (the "Initial Extension Right") at the end of the Initial Maturity Date to extend the Bond for another 12 months (the "Initial Extension Period") by giving written notice to that effect to the Company no later than sixty (60) days prior to the Initial Maturity Date. Any holder that has elected to exercise its Initial Extension Right will also have a further right at the end of the Initial Extension Period to extend its Bond for another 12 months (the "Second Extension Period") under the same notice conditions as stated in the Initial Extension.

If a holder elects to extend its Bonds, the Company may redeem such holder's Bonds at any time on payment of a 5% premium to redeem the Bonds ("Penalty")

The Company has set aside an amount equal to two years of interest in a separate bank account, which will be used to pay interest payable on the Bonds. Any interest accrued on such sum will be in favour of the Company. The set aside amount at June 30, 2020, is \$80,010 and is presented under Cash in the Consolidated statements Financial Position.

Bonds are secured by a pledge on the aggregate assets of the Company, maturing on May 29, 2023. The Company used the residual value method to allocate the principal amount of the bond between the liability and the contributed surplus. Under this method, an amount of \$64,896 (net of transaction costs) related to the warrants issued was applied to the contributed surplus.

The fair value of the liability component was \$ 309,916 computed as the present value of future principal and interest payments discounted at a rate of 22%.
